

**Key Economic Indicators**

**Gross Domestic Product (GDP)**

<b>Definition:</b> The total value of goods and services produced within a country's borders during a specific time period (usually a quarter or a year).
<b>Importance:</b> Primary indicator of economic size and growth. Used to compare the performance of different economies.
<b>Types:</b> <ul style="list-style-type: none"> <li>Nominal GDP: GDP measured at current prices.</li> <li>Real GDP: GDP adjusted for inflation. Provides a more accurate measure of economic growth.</li> <li>GDP per capita: GDP divided by the population. Indicates the average standard of living.</li> </ul>
<b>Calculation Methods:</b> <ul style="list-style-type: none"> <li>Expenditure Approach: <math>GDP = Consumption + Investment + Government\ Spending + (Exports - Imports)</math></li> <li>Income Approach: <math>GDP = Sum\ of\ all\ income\ earned\ within\ the\ country\ (wages,\ rent,\ profit,\ etc.)</math></li> </ul>
<b>Limitations:</b> Does not account for non-market activities (e.g., household work), environmental degradation, or income inequality.

**Inflation Rate**

<b>Definition:</b> The rate at which the general level of prices for goods and services is rising, and subsequently, purchasing power is falling.
<b>Measurement:</b> Typically measured using the Consumer Price Index (CPI) or the Producer Price Index (PPI).
<b>Consumer Price Index (CPI):</b> Measures the average change over time in the prices paid by urban consumers for a basket of consumer goods and services.
<b>Producer Price Index (PPI):</b> Measures the average change over time in the selling prices received by domestic producers for their output.
<b>Types:</b> <ul style="list-style-type: none"> <li>Demand-Pull Inflation: Occurs when there is too much money chasing too few goods.</li> <li>Cost-Push Inflation: Occurs when the cost of production increases (e.g., rising wages or raw material costs).</li> </ul>

**Unemployment Rate**

<b>Definition:</b> The percentage of the labor force that is unemployed but actively seeking employment.
<b>Calculation:</b> $(Number\ of\ Unemployed / Labor\ Force) * 100$ <ul style="list-style-type: none"> <li>Labor Force: Sum of employed and unemployed individuals.</li> </ul>
<b>Types:</b> <ul style="list-style-type: none"> <li>Frictional Unemployment: Temporary unemployment due to job transitions.</li> <li>Structural Unemployment: Unemployment due to a mismatch between the skills of workers and the requirements of available jobs.</li> <li>Cyclical Unemployment: Unemployment due to fluctuations in the business cycle.</li> </ul>
<b>Limitations:</b> Doesn't include discouraged workers (those who have stopped looking for work) or underemployed workers (those working part-time but wanting full-time employment).

**Fiscal and Monetary Indicators**

**Government Debt**

<b>Definition:</b> The total amount of money owed by a government to its creditors.
<b>Measurement:</b> Usually expressed as a percentage of GDP. Provides an indication of a country's ability to repay its debt.
<b>Impact:</b> High levels of government debt can lead to higher interest rates, reduced government spending on essential services, and potential economic instability.

**Budget Deficit/Surplus**

<b>Definition:</b> <ul style="list-style-type: none"> <li>Budget Deficit: Occurs when government spending exceeds government revenue.</li> <li>Budget Surplus: Occurs when government revenue exceeds government spending.</li> </ul>
<b>Impact:</b> Budget deficits can lead to increased government debt, while budget surpluses can be used to reduce debt or fund public programs.

**Interest Rates**

<b>Definition:</b> The cost of borrowing money, usually expressed as an annual percentage rate.
<b>Central Bank Influence:</b> Central banks (e.g., the Federal Reserve in the US) use interest rates as a tool to control inflation and stimulate economic growth.
<b>Impact:</b> <ul style="list-style-type: none"> <li>Lower interest rates encourage borrowing and investment, stimulating economic growth.</li> <li>Higher interest rates discourage borrowing and investment, helping to control inflation.</li> </ul>
<b>Types</b> <ul style="list-style-type: none"> <li>Federal Funds Rate</li> <li>Discount Rate</li> <li>Prime Rate</li> </ul>

**External Sector Indicators**

**Balance of Trade**

<b>Definition:</b> The difference between a country's exports and imports of goods and services.
<b>Trade Surplus:</b> Exports exceed imports.
<b>Trade Deficit:</b> Imports exceed exports.
<b>Impact:</b> Trade surpluses can boost economic growth, while trade deficits can reduce it.

**Exchange Rates**

<b>Definition:</b> The value of one currency in terms of another.
<b>Appreciation:</b> A currency becomes more valuable relative to another currency.
<b>Depreciation:</b> A currency becomes less valuable relative to another currency.
<b>Impact:</b> Exchange rates affect the price of exports and imports, influencing a country's trade balance.

**Foreign Direct Investment (FDI)**

<b>Definition:</b> Investments made by a company or individual in one country into business interests located in another country.
<b>Impact:</b> FDI can bring new technology, jobs, and capital into a country, boosting economic growth.

**Other Important Indicators**

## Consumer Confidence Index (CCI)

**Definition:** A measure of consumers' optimism or pessimism regarding the state of the economy and their personal financial situations.

**Impact:** High consumer confidence tends to lead to increased spending, while low consumer confidence tends to lead to decreased spending.

## Purchasing Managers' Index (PMI)

**Definition:** A measure of the prevailing direction of economic trends in the manufacturing and service sectors.

**Interpretation:** A PMI above 50 indicates an expansion of the sector, while a PMI below 50 indicates a contraction.

## Housing Market Indicators

**Examples:** New home sales, existing home sales, housing prices, and mortgage rates.

**Impact:** The housing market is a leading indicator of economic activity. A strong housing market tends to indicate a healthy economy, while a weak housing market tends to indicate a struggling economy.
